TeamViewer partners with Alleantia to provide full end-to-end remote service solutions

The TeamViewer IoT Agent will be integrated with Alleantia's IIoT Edge and Teleservice 4.0

Göppingen, Germany, February 18, 2020 - [TeamViewer](#), a leading global provider of secure remote connectivity solutions, today announced its partnership with [Alleantia](#), a leading provider of Industrial IoT Integration platform. The collaboration enables Alleantia and TeamViewer customers – machine builders, service teams, factory owners - to connect, program and analyze their shopfloor assets remotely. The partnership will combine remote PLC programming access, a unique plug&play IIoT Edge with its 5000+ devices library, and the benefits of an IoT cloud with the high interoperability and the well-known secure, end-to-end encrypted connectivity of TeamViewer.

The digitalization of shopfloors increases productivity and reliability significantly, improving the complete value chain. In addition to the obvious benefits, it can also be a main source of data to gain valuable insights. TeamViewer IoT and Alleantia IoT Integration Platform provide a joint solution that allows users to securely access to any machine and industrial device, remote program, build and access IoT information, and easily connect to TeamViewer IoT Cloud to use the captured data for monitoring dashboards and additional IoT applications. With the possibility to connect devices in no-time, the joint solution reduces maintenance costs and provides the ability to offer better services and faster reaction times for machine manufactures and operators.

Lukas Baur, VP IoT at TeamViewer, explains: "The processing of data generated on the shop floor is a key element to increase the overall equipment effectiveness, reduce costs and increase ROI. We are very happy to have Alleantia as a strong and well-known partner on board to drive the implementation of our solution in this field."

Antonio Conati Barbaro, Alleantia COO, adds: "Alleantia IIoT Edge software, with its plug&play connection capability for 90%+ of the industrial machines in the market and its Teleservice capability, together with TeamViewer's unique integrated secure access and IoT Cloud solution, are not only able to connect almost

any machinery on the shop floor of almost any client in no time, but also support all 'digital needs': remote assistance, asset monitoring, MES/ERP integration, predictive maintenance, and more. We lower the bar for IT/OT integration and for complete Industry 4.0 solution implementation significantly, which was one of the key concerns of our Clients."

About TeamViewer

TeamViewer is a leading global technology company that provides a connectivity platform to remotely access, control, manage, monitor, and repair devices of any kind – from laptops and mobile phones to industrial machines and robots. Though TeamViewer is free of charge for private use, the company has more than 500,000 subscribers and enables companies of all sizes and from all industries to digitalize their business-critical processes through seamless connectivity. Against the backdrop of global megatrends like device proliferation, automation and new work, TeamViewer proactively shapes digital transformation and continuously innovates in the fields of Augmented Reality, Internet of Things or Artificial Intelligence. Since the company's foundation in 2005, TeamViewer's software has been installed on more than 2.2 billion devices around the world. The company is headquartered in Goeppingen, Germany, and employs more than 1,000 people globally. In 2019, TeamViewer achieved billings of around EUR 325 million. TeamViewer AG (TMV) is listed at Frankfurt Stock Exchange and belongs to MDAX. Further information can be found at www.teamviewer.com.

About Alleantia

Alleantia S.r.l., based in Pisa, Italy, is an Independent Software Vendor (ISV) providing a very powerful and easy to use Industrial IoT Integration Platform. Gartner positions Alleantia among the market leaders in the 'IoT Integration Platform' segment, and Vendor to Watch as well. Frost & Sullivan awarded Alleantia in 2020 with the New Product Innovation Award for its 'Edge Integration Platform for IIoT'. More than 300 industrial companies, 30 ISVs and SI Partners have chosen Alleantia IIoT software to connect tens of thousands of industrial assets to Industry 4.0 Applications, on cloud and on premise, in many industrial sectors from Manufacturing to Food to Energy to Transportation, in Italy, China, Mexico, Brazil, and several other countries. Further information can be found at www.alleantia.com.
