Soluzioni in Ethercat

OMRON

realizing

Controller

CJ2 PLC

- Compatible with CJ1 and CJ2 PLCs
- Control of 16 servo axes
- Support for 64 device nodes
- Circular and linear interpolation
- Linear and infinite axes management
- Position registration capture
- Certified PLC open function blocks

Trajexia

- Control of 64 servo axes
- Scalable Motion controller system
- Electronic cams and gears
- Linear, circular, helical and spherical interpolation
- Open communication to PLCs, EtherNet/IP, PROFIBUS, DeviceNet

Servos

Accurax GS

- High-response frequency of 2 kHz
- Safety conforming to ISO13849-1
- High accuracy provided by 20 bit encoder
- Advanced tuning algorithms

- Rotary Motors from 50 W up to 15 kW

- Linear motor solutions

Inverters

MX2

- 200% starting torque
- Torque control in open loop
- Support for permanent magnet motors
- Positioning functionality
- Up to 15 kW

Vision

Xpectia FZM1

- Stable measurements under changing conditions
- Wide variety of positioning measurement methods
- Simple auto calibration
- Flexible camera installation

I/O

GX series

- Simple setup
- Easy wiring
- High-speed input

SmartSlice for Trajexia

- Up to 64 I/O units per station
- Screwless wiring
- Hot-swap with auto-restore

CJ2 PLC with EtherCAT

Complete and compact machine controller

In the minimum of space you can have a complete and powerful position control system when combining the Omron CJ2 PLC, the CJ1W-NC(EtherCAT) unit and the G5 servo drives with EtherCAT built-in. This configuration offers up to 16-axis positioning with linear and circular interpolation, as well as support for 64 I/O, inverter and vision device nodes over the network.

Scalable and modular solution

- CJ1 and CJ2 family CPUs available
- EtherCAT masters for 2, 4, 8 and 16 axes
- Wide range of CJ PLC modules

One Machine network

- Servo
- Inverter
- Vision system
- Distributed I/O

- Position controller supporting up to 16 servo axes
- Support for 64 I/O, inverter and vision device nodes
- Compact unit compatible with CJ1 and CJ2 PLCs
- Circular and linear interpolation
- Linear and infinite axes management
- Position registration capture
- Zone outputs (CAM outputs)
- Certified PLCopen motion control function blocks: Part 1 and 2
- Support for servo, inverter, vision system and I/O in a single EtherCAT network

Trajexia with EtherCAT

Total freedom in motion control

The stand-alone Trajexia controller TJ2-MC64 together with an EtherCAT master TJ2-ECT provides a significant improvement in machine performance and accuracy allowing you to run your machines faster. Controlling all 64 axes with a minimum system cycle time and with the use of 64 bit integers, Trajexia TJ2 ensures the fastest operation at the highest accuracy. It is ideal for highly-demanding packaging, printing and textile machines. As you would expect, a wide choice of best-in-class actuators are available to meet your needs in terms of size, performance and reliability.

- Powerful motion control**
- Single axis moves and axes interpolation
 - Electronic cams and gearboxes
 - Control of SCARA and Delta robots

- One Machine network**
- Servo
 - Inverter
 - Vision system
 - Distributed I/O

Trajexia with EtherCAT

Intuitive and powerful programming

Servoazionamento in Ethercat

Great machines are born from perfect match between electronics and mechanics. Accurax G5 gives you that extra edge to build more accurate, faster, smaller and safer machines.

You will benefit from an almost 25% reduction in motor weight, and gain 50% cabinet space.

EtherCAT

EtherCAT connectivity

- Compliant with CoE •CIA402 Drive Profile•
- Cyclic synchronous Position, Velocity and Torque modes
- Embedded Gear Ratio, Homing and Profile Position mode
- Distributed clock to ensure high precision synchronisation

Improved rotary motors

- Low cogging torque servo motors
- High accuracy provided by 20 bit encoder
- IP67 for all motors and connectors
- Large range of motors from 0.16 Nm up to 96 Nm nominal torque (224 Nm peak)

Improved linear motor solutions

- Ironless motor type with excellent force-to-weight ratio and no magnetic attraction force
- Iron-core motor type with optimum ratio between force and volume
- Compact and efficient design
- Linear parts and assembled linear systems available
- For customised linear systems contact your Omron sales representative

Up to 50% cabinet size reduction

- 40% smaller drive
- Extra 10% saving thanks to side by side mounting

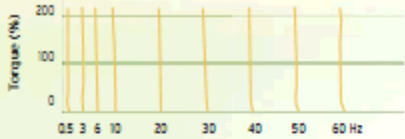

Inverter in Ethercat

OMRON

Thanks to the advanced design and algorithms, the MX2 provides smooth control down to zero speed, plus precise operation for cyclic operations and torque control capability in open loop. The MX2 is fully integrated within the Omron automation solutions.

Frequency response vs Torque variation

(Example with 7.5 kW 4-pole motor)

200% starting torque

- Near stand-still operation (0.5 Hz)
- Smooth control of high inertia loads
- Control of fast cyclic loads

Torque control in open loop

- Ideal for low to medium torque control applications
- Can replace a flux vector inverter or servo drive in suitable systems

EtherCAT

EtherCAT connectivity

- Compliant with CoE +CIA402 Drive profile
- Velocity Mode

Quick response to load fluctuation

- MX2 provides accurate speed control with less than 2% error at 1Hz
- Stable control without lowering machine speed

Special motors

- Permanent magnet motors
- High speed motors up to 1000 Hz

GX Series Block I/O

High-speed remote I/O terminals

An extensive line-up of digital I/O terminals, analogue I/O terminals and encoder input terminal are available for EtherCAT connectivity. The wiring type of the digital I/O terminal can be either screw terminal block or e-CON formats, it's your choice.

GX I/O features

- Easy installation and wiring, all modules have EtherCAT connectivity built-in
- Simple setup, EtherCAT node addresses can be easily set with a simple rotary switch
- The allocation area of the remote I/O terminal is automatically decided by simply setting the node address
- High-speed input
- The digital I/O terminals are equipped with high-speed input functionality, ON/OFF delay of 200 μ s max.
- Digital input filter prevents malfunction when status is unstable due to chattering or noise. Available input filter values are 0 ms, 0.5 ms, 1 ms (default), 2 ms, 4 ms, 8 ms, 16 ms and 32 ms

SmartSlice

Plug-and-Play I/O for Trajexia

SmartSlice I/O units extend Trajexia's I/O capability with digital and analogue I/O units, ranging from basic relay outputs to configurable temperature inputs. All SmartSlice units feature screwless 'push-in' I/O wiring, detachable I/O connector, and hot-swap capability. The SmartSlice EtherCAT "coupler" automatically scans the connected I/O units at startup. The Trajexia controller with EtherCAT master will automatically map the detected I/O data to its designated I/O allocations.

SmartSlice I/O features

- Up to 64 I/O units per station
- Automatic I/O assignment
- Easy configuration backup
- Hot-swap with auto-restore
- Optional address setting

FZM1: Vision System for Motion

For DELTA and SCARA ROBOTS

For Motion Stage

Feature

- EtherCAT communication
- Additional Measurement Items for Positioning
Measurement : ECM search M , EC Corner , EC Cross ,etc
- New Automatic calibration for Robots and XY and UVW stage.
