

SIRTEL

Segnalazioni luminose d'emergenza

Professional, portable rechargeable lamps, highly resistant to vibrations and shocks (IK 08), floating and submersible (IP 67).

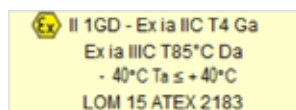

The new LED series are the LR and the LRX (explosion proof version, ATEX certified). Both series have the following features:

- a single frontal high power LED, which assures an illumination up to 760 lm for the LR and 338 lm for the ATEX one
- an optional front or rear (or both) signalling coloured LEDs crown with flashing or steady lighting with up to 3 colours on the same lantern.
- Constant light intensity controlled by microprocessor.
- Illuminating capacity over 300m.
- Small dimensions and limited weight (from 950gr to 1400gr max, depending on the version)
- Lighting autonomy from 2.5h to 24h, depending if using low, medium or high power and if flashing or not.
- Individual and permanent laser customization with also company logo.
- Chargers for mobile use (12/24Vcc - 48Vcc -

72Vcc) and fixed use (85 ~ 265Vac).

- Long battery life (not less than 4,5 years)

The LRX version, to be used in hazardous atmospheres (Gas "0" - Dust "20"), has the following ATEX certification:
